SQL	60%

WORK EXPERIENCE

Software Engineer II
SUNRx

September 2016–June 2019

Executed and contributed to full stack web development projects through the software development life cycle using C#, SQL Server, .NET, and IIS

Utilized MVC architectural pattern to develop critical components of software, including order entry, management tools, and reporting pages using an SCSS pre-processor

Led project to migrate acquired company's legacy code to a single page application (SPA) using Angular, MongoDB, Express.js, and Node.js

Coding Boot Camp Teaching Assistant
UCLA Extension

June 2018–February 2019

Ensured that all students fully comprehend both front-end and back-end technologies, including HTML5, CSS3, JavaScript, Java, jQuery, Express.js, React.js, Node.js, MongoDB, and MySQL

Engaged one-on-one with students to debug code for assignments and portfolio projects

Project Manager

December 2015–October 2016

Partnership HealthPlan of California

Developed and managed work breakdown structure (WBS) of information technology projects

Managed project execution to ensure adherence to budget, schedule, and scope

Web Developer

October 2012–December 2015

Get Fit Davis

Architected and developed MySQL database for member event registration and instructor class scheduling

Designed user interface for users to register and view race results, using React.js and integrating with PayPal

Collaborated with management and users to develop content criteria, prioritize needs, and develop strategies to integrate with site

EDUCATION

University of California, Davis

August 2006–June 2011
